IT'S ALL ABOUT TRUST

YOUR RELIABLE PARTNER ON THE JOURNEY

In the global logistics landscape, whether traversing the vast Siberian plains of Russia, navigating the winding Andes in Chile, or moving through the bustling ports of Vietnam, Dongfeng GX is always a trustworthy partner by your side.

We understand that the challenges of long-haul logistics lie in long distances, high timeliness, complex road conditions, and the ultimate demand for vehicle reliability.

That's why Dongfeng GX has been designed from the outset with the core concepts of "efficiency, reliability, comfort, and safety" to provide an ideal vehicle that meets all challenges, enhances operational efficiency, and reduces costs.

A Fusion of Aesthetics and Practicality

The exterior design of the Dongfeng GX blends Eastern aesthetics with Scandinavian design. Its design not only pursues beauty but also emphasizes aerodynamic performance, exuding an air of majesty and confidence. Our meticulous attention to detail reflects our respect and commitment to every journey you take.

Front Fascia: The distinctive grille design, complemented by extensive chrome accents, exudes an air of majesty and confidence.

Aerodynamic Features: Streamlined cab, deflectors, and side skirts optimize airflow, reducing drag, boosting fuel economy, and enhancing stability at high speeds.

Advanced Lighting System: High-definition long-range cameras and long-distance millimeter-wave radar ensure clear visibility in low-light or adverse weather conditions. LED headlights with auto-adjustment adapt to road and ambient light conditions. Fog lights, turn assist lights, and side illumination lights provide comprehensive safety coverage.

Dongfeng GX offers a range of body colors, from classic white and elegant black to vibrant blue and red, catering to diverse personal preferences.

Available Color

We also provide customized color schemes. You can choose a unique body color based on your own taste or corporate brand image.

By selecting Dongfeng GX, you're not only choosing a truck with outstanding appearance, but also a solution that enhances your corporate image and operational efficiency.

Based on your needs
we focus on transportation efficiency and reliability

The Dongfeng GX's powerful and efficient engine system ensures smooth and ample power across various road conditions.

At the same time, our integrated powertrain is meticulously tuned to ensure high efficiency in power delivery, so every drop of fuel is fully utilized, helping you reduce operating costs and enhance economic benefits.

As you traverse rugged mountain roads, with the majestic snow-capped peaks as your backdrop, we are with you every step of the way, conquering each journey and creating brilliance together.

Powerful & Efficient

The Perfect Combination

Dongfeng GX is equipped with the renowned Dongfeng Cummins Z14/ISZ engines and Dongfeng Renault Dci engines, known for their outstanding power performance and fuel efficiency. These engines deliver high horsepower and maintain high torque at low RPMs, ensuring effortless performance in all road conditions.

Dongfeng Cummins

Eaton Cummins

Dongfeng Dana Axle

The Dongfeng GX features an integrated powertrain that includes the Eaton Cummins automated transmission and DDAC rear axle. This integrated design not only enhances transmission efficiency but also reduces shifting frequency by 25% compared to similar products. The intelligent control logic between the engine and transmission ensures smoother gear changes, less driver fatigue, lower fuel consumption, and extended vehicle lifespan.

In real-world operations, the powertrain of the Dongfeng GX significantly boosts transportation efficiency. During long-distance highway driving, the vehicle operates within the optimal fuel consumption range, reducing unnecessary fuel usage. In mountainous or complex road conditions, its strong low-speed torque and rapid gear-shifting capability ensure easy hill climbing and stable driving, eliminating the need for frequent downshifting and concerns about insufficient power. This efficient power output and transmission system not only ensures timely delivery of goods but also saves considerable fuel costs in long-term operations.

We meet your expectations for an exceptional driving experience.

Therefore, the Dongfeng GX's cabin is equipped with an intelligent control system that responds precisely to every command, making driving effortless and enjoyable.

After a long journey, every detail inside the living space is carefully designed to provide you with a comfortable, home-like experience.

As you drive the Dongfeng GX along the winding coastal roads, accompanied by the sea breeze, we are with you to embrace every sunrise and sunset together.

Long-haul driving is a challenge for drivers, but the Dongfeng GX is committed to providing you with a comfortable, convenient, and intelligent driving environment. The cab features a full air-suspension system, including eight airbags on the chassis, four airbags on the cab, and air-suspension seats. This all-around vibration reduction design effectively filters out road bumps, reduces driving fatigue, and ensures the integrity of the cargo.

A Journey of Intelligent Driving

Inside the cab of the Dongfeng GX, every journey is an encounter with technology and comfort. We understand that for you, who undertake long-distance drives, a precisely controlled and intelligent, convenient driving environment is of utmost importance. The cab of the Dongfeng GX is designed precisely to meet these needs.

The interior of the cabin is spacious and is equipped with a 12.3-inch full LCD instrument cluster and a 12.8-inch large central touchscreen, creating an immediate "smart cockpit" feel. This sedan-like interior design is not only aesthetically pleasing but also provides rich information display and a convenient operational experience.

The Dongfeng GX is equipped with an advanced electronic-controlled hydraulic power steering system, which intelligently adjusts the steering assistance based on vehicle speed and steering angle, allowing you to enjoy precise and effortless handling in various road conditions.

At the same time, the cab's cold climate configuration has been enhanced by removing the rear window and adding an insulation layer between the interior and the white body, improving the cab's thermal insulation properties. The vehicle is equipped with a 4kW parking heater, which can adjust the airflow intensity in real-time based on the ambient temperature. Additionally, four coat hooks are installed to conveniently store winter clothing for the driver.

Home-like Comfort

Dongfeng GX offers a unique cabin experience with the spaciousness comfort, and attention to detail you expect from a top-tier model.

The living compartment of the Dongfeng GX is equipped with spacious bunks that offer a premium sleeping experience, whether for a short rest or an overnight stay. We have carefully selected the materials and designed the bunks to ensure their comfort and durability, so that you wake up refreshed and revitalized every time.

Details make all the difference in the travel experience. The cabin is equipped with soft-touch interior materials to prevent the driver from being injured during operation. The dashboard features a hidden ticket compartment, oversized storage spaces, and multiple cup holders, all designed for convenience, allowing the driver to easily store items and rest during long trips. The cab is equipped with a 25L refrigerator, catering to the dietary needs of two drivers during long-distance trips. Additionally, the vehicle is equipped with color-changing ambient lights, enabling you to create a personalized home-like atmosphere.

A Versatile and Reliable Partner

In the ever-changing world of logistics, you need a vehicle that maximizes productivity in any working condition. Dongfeng GX delivers exceptional performance and reliability, meeting your needs across a wide range of applications, including delivery, freight, cold chain, hazardous materials, timber, and mining transportation.

01 Long-distance Delivery

Low fuel consumption
high efficiency
more productive

02 Cold Chain

Good preservation effect

high adaptability

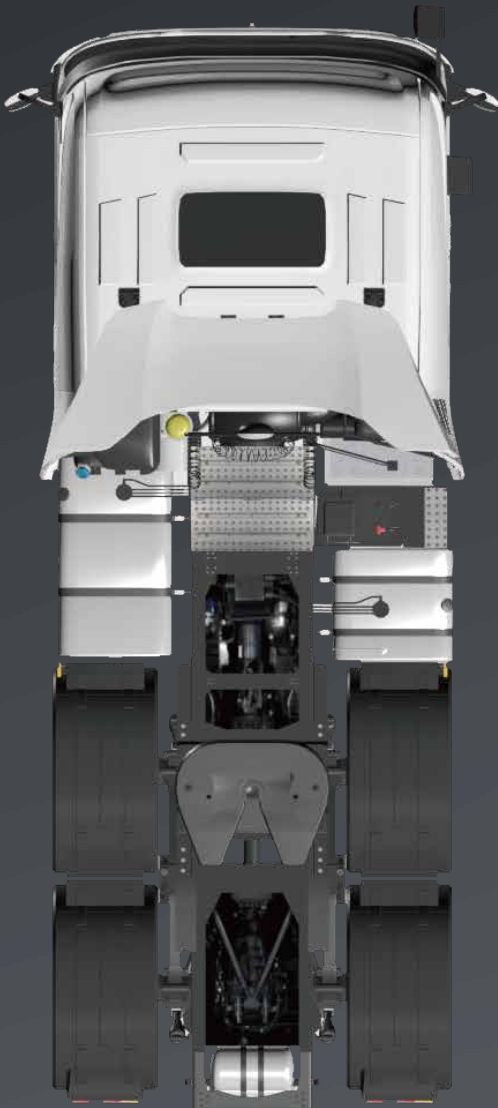

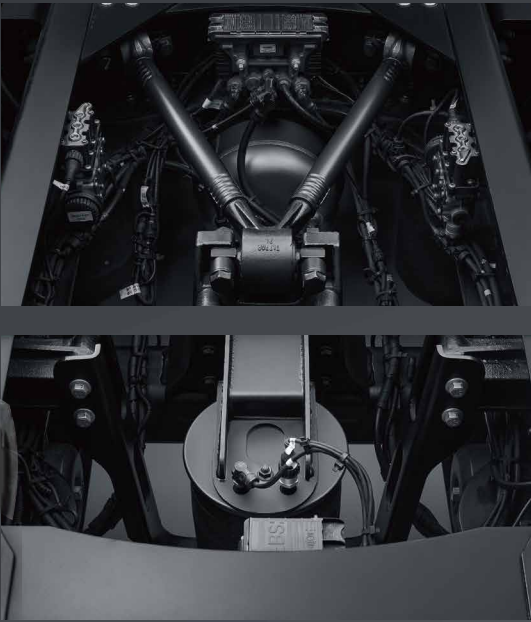

Withstands the Test of Time

Up-time, the proportion of time a vehicle remains in normal operating condition within a given period.

Dongfeng GX's reliability stems from its stringent R&D system and high-quality parts supply network. From concept to production, it undergoes the most rigorous development process in the industry, ensuring every vehicle meets exceptional quality standards. The load-bearing parts are equipped with high-strength bolts, and the chassis features Volvo-standard thickened self-locking anti-loosening nuts. These robust components effectively withstand vibrations and impacts during long-haul transport, ensuring long-term stable operation.

Dongfeng GX's reliability is backed by its stringent R&D system and a global network of top-tier suppliers, including Eaton transmissions, Voith retarders, Knorr-Bremse brakes, and Delphi connectors. These high-quality components ensure optimal vehicle performance and reliability.

Moreover, the chassis components feature a paint film thickness of over 60μm, and the powder-coated frame offers industry-leading corrosion resistance. These meticulous design details further enhance the vehicle's durability and lifespan.

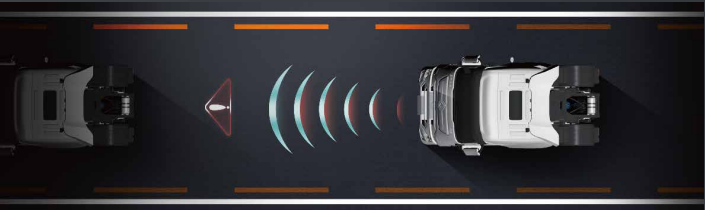

Safety at Your Command

Safety is always the top priority during the journey.
The comprehensive safety system provides the most reliable protection for every trip you take.

The vehicle is equipped with an advanced Advanced Driver Assistance System (ADAS), including features such as Forward Collision Warning (FCWS), Lane Departure Warning (LDW), and Automatic Emergency Braking (AEB).

Scene depth perception, foreground vehicle analysis, ultra-long range perception algorithm PLUS, industry-leading technology, enhancing driving safety.

Dongfeng GX excels in braking performance with its integrated Dongfeng Cummins Z14 engine braking and Voith retarder, achieving a maximum stable wheel-end braking power of up to 660 kW. This robust auxiliary braking system not only effectively reduces braking distance but also minimizes brake pad wear, extending maintenance intervals and lowering operational costs. Additionally, the vehicle features intelligent load-based braking adjustment, automatically optimizing braking intensity according to the load to ensure stable and reliable braking performance in all conditions.

A Solid and Reliable Backstop

With excellent structural design and high safety standards, it provides the final line of defense, ensuring maximum protection for you and your cargo in the event of an unavoidable collision.

In the event of an unavoidable collision, the passive safety design of the Dongfeng GX provides you with the strongest protection. The body structure is made from high-strength steel, meeting the European ECE R29-03 regulations. This robust structure is capable of absorbing impact forces to the maximum extent during a collision, ensuring the safety of the driver and passengers. The body of the Dongfeng GX acts like a strong armor, shielding you from external risks.

The chassis' cold climate performance has been improved with the addition of longitudinal mudguards on both sides of the engine and segmented structural side skirts on both sides of the chassis, enhancing the vehicle's resistance to dirt and debris in snowy and icy conditions. The sealing characteristics of the chassis wiring harness interfaces have been optimized to improve the electrical waterproofing and dirt resistance of the chassis. Additionally, the low-temperature performance of the pipelines has been optimized to eliminate the risk of gas and liquid leaks.

Dongfeng GX is committed to safety, proven by rigorous testing. It successfully completed China's first 50 km/h full-frontal crash test for commercial vehicles, maintaining the required survival space.

The vehicle's energy-absorbing structures, including the steering column, mounts, and knee bolster, play a crucial role in dissipating impact energy, ensuring the safety of occupants during a collision.

Always Ready

Dongfeng GX ensures your vehicle maintains peak performance throughout its operation.

- 01 **warranty for the entire vehicle**
1-year warranty for the entire vehicle, with no mileage limit.
- 02 **warranty for the powertrain**
2-year warranty for the powertrain, with no mileage limit.
- 03 **Service**
Over 400 service centers to ensure worry-free driving for your vehicle.

Dongfeng Commercial Vehicle has provided exclusive high-end service commitments for GX users, including a 1-year unlimited mileage warranty for the entire vehicle and a 2-year unlimited mileage warranty for the powertrain. These service commitments are designed to offer users the most reliable protection and ensure that the vehicle remains in optimal condition throughout its operation.
